

Art of Diamond

The World's Most Exclusive Paint Work

From the beginning, diamonds have been fascinating their beholders and owners. Venerated as tears of the gods and for their inherent healing powers, they are also the epitome of strength and invincibility. They have made their long journey from earth's deepest inner recesses to the surface to cast a spell over us and enchant us.

We are spellbound when we hold something in our hands that is rare or appears unaffordable. That includes precious jewels, above all diamonds. Their rare beauty seemingly cannot be expressed in words – their exceptional sparkle, their quality of 'invincibility' as the hardest of all precious gems, their magic inner luminosity. These are just some of the superlatives that apply to diamonds.

Exclusive rings, necklaces, jewellery and watches, their mysterious sparkle or Marilyn Monroe with her song «Diamonds are a girl's best friend» - what does the word diamonds make you think of? But do

you also think of walls, furniture, sculptures, cars, motorbikes, interiors of yachts and air planes, a special logo or lettering?

Today, the history of diamond fashioning is being rewritten. Luxury Refinish, a Swiss manufactory, is the first company to offer a new and revolutionary process to place real diamonds on objects of any kind. We do not use any diamond dust, metal pigments, glass fibre or crystals but real diamonds. These precious objects are protected by a special clear varnish that guarantees their easy care and suitability for daily use.

This new and worldwide exclusive technology allows us to fulfil your wishes for studding real diamonds on any surface. «Diamonds are a girl's best friend» - that was yesterday.

Today, diamonds are «everyone's darling.» ■
